

Nagar Yuwak Shikshan Sanstha's

Yeshwantrao Chavan College of Engineering

(An Autonomous Institution affiliated to Rashtrasant Tukadoji Maharaj Nagpur University)

Hingna Road, Wanadongri, Nagpur - 441 110

NAAC A++

Ph.: 07104-237919, 234623, 329249, 329250 Fax: 07104-232376, Website: www.ycce.edu

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Name and Signature of Student and Date

(Signature and Date in Handwritten)

Session	2026-27	Course Name	Web Technology Lab
Semester	3	Course Code	23CT1301
Roll No	13	Name of Student	Juhi Parwani

Practical Number	1(A)
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.
Aim	Introduction to Internet (Overview of Internet, E-mail, WWW, FTP).
Problem Definition	A. Introduction to JavaScript (Loop, Conditional Statement) and Form Validation. Sample Problem Statement: Build a registration form (name, email, password, phone number) and write JavaScript to validate all fields on submit, displaying inline error messages
Theory (100 words)	JavaScript is a scripting language used to make web pages interactive and dynamic. It supports conditional statements (if-else) for decision-making and loops (for, while) for repeating tasks. Form validation is the process of checking user input before submitting a form. In a registration form, JavaScript validates fields such as name, email, password, and phone number to ensure that the entered data is correct. If any field contains invalid data, inline error messages are displayed to help the user correct it.

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Procedure and Execution (100 Words)	Step for Implementation:
	1. Create an HTML registration form with Name, Email, Password, and Phone Number fields. 2. Design the form using CSS for better appearance. 3. Use JavaScript to access the input fields. 4. Apply conditional statements (if-else) to validate each field. 5. Check the email format, password length, and phone number using validation conditions. 6. Display inline error messages for invalid inputs. 7. Display a success message if all fields are valid and prevent submission if errors exist.

	Output: 
Output Analysis	The experiment successfully demonstrates the use of JavaScript conditional statements and form validation to create a user-friendly registration form with proper input validation and inline error messages.
Link of student Github profile where lab assignment has been uploaded	https://github.com/juhiparwa-1507/Web-Technology-Lab.git
Conclusion	The registration form is successfully displayed, and JavaScript validates the entered details. Inline error messages are displayed for invalid inputs, while valid inputs are accepted.
Plag Report (Similarity index < 12%)	Plagiarism Report: To be attached.
