

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.**Mission:** Means to achieve Vision

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Name and Signature of Student and Date

(Signature and Date in Handwritten)

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session	2024-25 (ODD)	Course Name	Web Technology Lab
Semester	3	Course Code	23CT1301
Roll No	13	Name of Student	Juhi Parwani

Practical Number	
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.
Aim	To develop and demonstrate the usage of Inline, Internal, and External Style Sheets using CSS.
Problem Definition	Develop a Student Registration Form using HTML and apply Cascading Style Sheets (CSS) using three different methods: Inline CSS, Internal CSS, and External CSS. The form should contain fields such as Full Name, Email, Password, and Phone Number along with Registration and Reset buttons. The purpose is to understand how different CSS methods can be used to style HTML web pages
Theory (100 words)	CSS (Cascading Style Sheets) is used to control the presentation and layout of HTML web pages. CSS can be applied to an HTML document in three ways: Inline CSS, Internal CSS, and External CSS. Inline CSS is applied directly to an HTML element using the style attribute. It is useful when a specific style needs to be applied to a single element. Internal CSS is written inside the <style> tag within the <head> section of an HTML document. It is useful when styles are required for a single web page. External CSS is written in a separate .css file and connected to the HTML document using the <link> tag. It is useful for applying the same styles to multiple web pages and keeps HTML and CSS code separate.

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Procedure and Execution (100 Words)	Step for Implementation: 1. Create a new HTML document. 2. Add the title Student Registration Form. 3. Create a Student Registration Form using HTML. 4. Add input fields for Full Name, Email, Password, and Phone Number. 5. Add Register and Reset buttons. 6. Demonstrate Inline CSS using the style attribute. 7. Demonstrate Internal CSS using the <style> tag. 8. Demonstrate External CSS using a separate style.css file. 9. Link style.css with the HTML file using the <link> tag. 10. Open the HTML file in a browser. 11. Observe and verify the applied styles. Code: 1. INLINE CSS <pre><!DOCTYPE html> <html> <head> <title>Student Registration Form</title> </head> <body style="background-color: pink; text-align: center;"> <h1 style="color: black; margin: 20px; border: 2px solid black;"> Student Registration Form </h1> <form> <label style="color: blue; padding: 8px; text-align: left;"> Full Name: </label> <input type="text" id="name">

 <label style="color: blue; padding: 8px; text-align: left;"> Email: </label> <input type="text" id="email">

 <label style="color: blue; padding: 8px; text-align: left;"></pre>

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Output:

1. Inline CSS

A Student Registration Form is displayed with a pink background, styled heading, blue labels, and colored Register and Reset buttons.

Student Registration Form

Full Name:

Email:

Password:

Phone number:

2. Internal CSS

A Student Registration Form is displayed with a violet background, styled input fields, and colored Register and Reset buttons using CSS written inside the `<style>` tag.

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Student Registration Form

Full Name:

Email:

Password:

Phone number:

Register Reset

3.External CSS

A Registration Form is displayed with a lavender background, blue heading, centered form, styled input fields, and green and red buttons using an external CSS file.

Registration Form

Full Name:

Email:

Password:

Phone Number:

Registration Reset

Department of Computer Technology

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Output Analysis	The experiment demonstrates the use of three types of CSS: Inline CSS, Internal CSS, and External CSS. Inline CSS applies styles directly to individual HTML elements, Internal CSS applies styles using the <code><style></code> tag within the HTML document, and External CSS applies styles through a separate CSS file linked using the <code><link></code> tag. The Student Registration Form was successfully styled using all three methods.								
Link of student Github profile where lab assignment has been uploaded	https://github.com/juhiparwa-1507/Web-Technology-Lab.git								
Conclusion	Thus, the usage of Inline, Internal, and External Style Sheets was successfully demonstrated using CSS. The Student Registration Form was designed and styled effectively using different CSS techniques.
