

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.**Mission:** Means to achieve Vision

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session	2024-25 (ODD)	Course Name	Web Technology Lab
Semester	3	Course Code	23CT1301
Roll No		Name of Student	

Practical Number	
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.
Aim	To understand commonly used HTML tags and create a simple webpage by using these tags.
Problem Definition	Create a simple webpage that presents information in an organized manner. The webpage should demonstrate the use of headings, paragraphs, lists, hyperlinks, and the basic structure of an HTML document.
Theory (100 words)	HTML is used to arrange the content displayed on a webpage. It uses predefined tags to tell the browser how different parts of the page should be treated. An HTML file normally begins with a document declaration followed by the <code><html></code> element. The document is divided into a <code><head></code> and a <code><body></code>. Different tags are used for different purposes. Heading tags are used to display titles and subheadings, while the paragraph tag is used for normal text. Lists can be created using ordered or unordered list tags. The anchor tag allows a webpage to connect to another page through a hyperlink. By combining these elements, a simple and properly arranged webpage can be developed.

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Procedure and Execution

(100 Words)

Step for Implementation:

Create an HTML file.

Add the document declaration.

Write the `<html>`, `<head>`, and `<body>` sections.

Insert headings using heading tags.

Add information using paragraph tags.

Create an unordered list for skills.

Insert a hyperlink using the anchor tag.

Save the document and view it in a browser.

Code:

`<!DOCTYPE html>``<html>``<head>``<title>My Basic Web Page</title>``</head>``<body>``<h1>Welcome to My Web Page</h1>``<h2>About Me</h2>``<p>`

Hello! I am a Computer Technology student.

I am learning Web Technology and HTML.

`</p>``<h2>My Skills</h2>````<li>HTML</li>``CSS``<li>JavaScript</li>````<h2>Useful Link</h2>``<p>`

	<pre>Google for more information. </p> </body> </html></pre> Output: 
Output Analysis	The webpage was displayed successfully in the browser. The heading and subheadings appeared at different levels, the paragraph was shown as normal text, and the skills were displayed as a list. The hyperlink also worked correctly when selected. Hence, the required HTML elements were implemented successfully.
Link of student Github profile where lab assignment has been uploaded	https://github.com/juhiparwa-1507/Web-Technology-Lab.git
Conclusion	The practical provided an understanding of how HTML elements are used to arrange webpage content. A simple webpage was created successfully by combining headings, paragraphs, lists, and a hyperlink.
